

Week Commencing 30.3

Number Recognition.

Go on a number hunt around your house. Write the numbers down. Which number is the lowest number? Which number is the highest number? Can you order the numbers?

Use the number cards to play pairs, make more and play snap.

If you have a garden chalk numbers on the floor. You say a number and your child has to jump on the number. If you have no garden write the numbers on a piece of paper- be careful when you jump as they may be slippery.

Put numbers up around the house and the children have to find all the 2's or all the 4's.
